

Sail Marinal TBN-100 Marine Oil

Ultimate performance, extra-high quality, and ultra alkaline cylinder diesel engine oil. It is formulated from ultra-refined high viscosity index virgin base fluids and additive packages to provide fuel efficient, increased output, ultra-alkaline oil with robust anti-oxidant, anti-wear and anti-corrosion properties for marine diesel engines operating in high-pressure and high-temperature conditions and for all ranges of oil stress.

Feature & Benefits

- ❖ Robust anti-wear and anti-corrosion properties for prolonged engine and component life
- ❖ Excellent alkaline reserve and retention for protection against rust and corrosion caused by acidity
- ❖ Maximum engine output and fuel efficient lubricant
- ❖ Outstanding control against sludge and other deposit build-up in critical engine parts such as pistons, piston rings, ring grooves, under piston spaces and in cylinder ports
- ❖ Active detergency resulting in cleaner engine and components
- ❖ Compatible with heavy fuel operated engines, providing protection and neutralising acids caused by high sulphur content
- ❖ Excellent high temperature performance

Applications

- ❖ Cylinder lubrication of all crosshead-type marine diesel engines operating in high pressure and high temperature conditions

Specification

- ❖ Meets or exceeds MAN and WARTSILA approvals
