

## Sail Marinal TBN-30 Marine Oil

High performance, premium quality with mild alkalinity diesel engine oil designed for medium speed residual-fueled engines. It is formulated from ultra-refined high viscosity index virgin base fluids and additive systems to meet the desired alkalinity, wear and corrosion protection, detergency, thermal and oxidation stability, and water separation characteristics

### **Feature & Benefits**

- ❖ Superior anti-wear properties for prolonged engine and component life
- ❖ Very good alkaline reserve and retention for protection against rust and corrosion caused by acidity
- ❖ Active detergency resulting in cleaner engine and components
- ❖ Excellent thermal and oxidation stability for effective control of sludge and other deposit build-up
- ❖ Longer oil life
- ❖ Compatible with heavy fuel operated engines, providing protection and neutralising acids caused by high sulphur content
- ❖ Superior water separation properties

### **Applications**

- ❖ Industrial or marine engine main propulsion and auxiliary engines with a moderate oil stress operating environment
- ❖ Medium-speed trunk piston engines that run on residual fuels
- ❖ Stationary equipment that runs on heavy fuel
- ❖ Marine or stationary engines that require oil with very high alkalinity

### **Specification**

- ❖ Meets or exceeds MAN and WARTSILA approvals
